

LIAISON
SYSTEMS

MAINTAIN

Maintain is an easy and cost effective approach to planned preventative maintenance that removes complexities and provides clarity.

Maintain helps you to easily identify and manage maintenance schedules. There is no software to install or equipment needed.

Simply enter an asset, select a job schedule, define the job period, select the start date and Maintain will do the rest.

PPM Made Simple

Maintain is a PPM system that help to easily identify and manage maintenance schedules with no addition equipment or software.

Individual Engineer Schedules

Simple engineer sign in for daily and weekly schedules.

Schedule Library

Create your own schedules or grab a pre built template from Maintain's large schedule library.

Unplanned Job Incorporation

Emergency and one-off unscheduled jobs can easily be incorporated and assigned to an engineer.

Removes The Need For Spreadsheets

No more overcrowded and complex spreadsheets. Maintain filters and presents only the jobs upcoming in the following days and weeks.

Job Ticket Merge

Overlapping asset schedules can be combined into one job ticket to simplify task management.
