LIAISON SYSTEMS

VIEW

View simplifies the management of building information, offering a user-friendly Building Information Library system. Designed for secure off-site storage of estate and operational documentation, it's the ideal tool for owner-occupiers and property professionals responsible for office space maintenance and operations.

With View, authorised users gain effortless access to property information. The intuitive interface is specifically crafted to make managing and updating building data straightforward and stress-free.

Electronic Library for Building Occupiers

A secure, easy-to-use online document library for building occupiers and O&M manual storage, with no requirement for additional software or specialist equipment.

File Content Search Engine

Quickly locate drawings and documentation using a powerful keyword search across individual manuals or entire projects.

Control User Access

Restrict access to specific manual sections and set up time-based user accounts that automatically expire at project completion.

Expiry Date Warnings

Track time-sensitive documents with automatic expiry alerts for critical items such as insurance and compliance records.

Remote Shared Access

Access, share, and collaborate on drawings from any location, supporting efficient information gathering across laptops, PCs, tablets, and smartphones.

Full Audit History

Always view the latest document revisions, with a complete historical audit trail available whenever required.
