

PLANNED PREVENTATIVE MAINTENANCE

A SIMPLE WAY TO **MAINTAIN** YOUR BUILDING.

Maintain brings clarity to planned preventative maintenance with a system built around simplicity and control, so your buildings run on a plan, not on firefighting.

PPM • SCHEDULE LIBRARY • JOB TICKETS • UNPLANNED JOBS

WHY MAINTAIN

PPM, SIMPLIFIED.

01 / SPREADSHEETS

PPM buried in spreadsheets

Cluttered spreadsheets hide what matters. Maintain displays only the upcoming jobs scheduled for the next few days and weeks, clarity, not clutter.

02 / LOST DATA

History lost with every provider

When maintenance providers change systems, years of data disappear. Maintain is a single, consistent, long-term PPM platform - history, asset records and job data stay intact and traceable.

03 / ENGINEERS

Engineers without clear schedules

Every engineer gets simple access to their own daily and weekly maintenance schedules - no chasing, no confusion.

04 / REACTIVE WORK

Urgent jobs derail the plan

Unscheduled and urgent jobs are seamlessly integrated and assigned to the appropriate engineer, without breaking the planned programme.

05 / SETUP

Schedules built from scratch

Build your own maintenance schedules or select a ready-made template from Maintain's comprehensive library.

06 / DUPLICATION

Overlapping asset tasks

Combine overlapping asset schedules into a single job ticket, simplifying task management and cutting wasted visits.

TRUSTED BY AXA IM

CAPABILITIES

SIMPLICITY & CONTROL.

PPM

PPM made simple

Simplify the identification and management of maintenance schedules - no additional software or equipment required.

ENGINEERS

Individual engineer schedules

Simple engineer access to daily and weekly maintenance schedules.

LIBRARY

Schedule library

Build your own schedules or pick a ready-made template from the comprehensive library.

UNPLANNED

Unplanned job incorporation

Urgent jobs slot seamlessly into the programme and go straight to the right engineer.

CLARITY

Eliminate spreadsheets

See only the upcoming jobs for the next few days and weeks - nothing else.

TICKETS

Job ticket merge

Merge overlapping asset schedules into one ticket for simpler task management.

TRUST & SECURITY

SECURE & RELIABLE.

ISO 27001

Certified hosting

Hosted in ISO 27001 certified servers with enterprise-grade infrastructure with 99.9% uptime.

TLS 1.2+

Encrypted in transit

All data protected with modern cipher suites.

BACKUPS

Daily & encrypted

Automatic daily backups and encrypted restores.

GDPR

24/7 monitoring

Proactive issue detection. Your data always remains yours.

CASE STUDY

THE END OF LOST MAINTENANCE DATA.

Maintain solved a long-standing challenge for organisations that repeatedly lost maintenance data whenever providers changed systems. By introducing a single, consistent, long-term PPM platform, Maintain ensured that maintenance history, asset records and job data remained intact and traceable across the entire building lifecycle.

"Whenever I have asked for assistance, the guys immediately respond. What more could you ask from a supplier?"
